Greeting with saying 'Namaste' by joining Hands together following by 2-3 Minutes Happy session, Celebrating birthday of any student of respective class and National Anthem

Lecture Starts with-

Topic to be discussed today- Today I will discuss about the Philosophy of Open Source Software (OSS)

What is open source?

The term 'open source' refers to something people can modify and share because its design is publicly accessible. This term originally referred to open source software (OSS).

Richard Stallman *"Open source is a development methodology; free software is a social movement."*

The general philosophy of OSS based on "Small is beautiful" as it complies with the idea of a powerful and complex computer system that is very simple and extensible. So, it's a code that is designed to be publically accessible. Anyone can see, modify and distribute the code.

Academic Day ends with- National song' VandeMataram'
